BIJAKMATCH
Your trusted career advisor for TVET workers

PITCH DECK

SAME HANDS. NEW WORK.

A career planner that reads a TVET worker's certificates and real daily tasks, then shows a clear, affordable next step.

PREPARED BY
KMJDIHATIKU

[Event name · date]

WHY NOW · 02

THE JOBS ARE CHANGING.
THE WORKERS ARE NOT READY.

HEADLINE

The Sun Daily, via TalentCorp, 14 Aug 2025

TVET TODAY

[Clipping: The Sun, Oct 2025
TVET enrolment headline]

439,000
TVET LEARNERS

GREEN JOBS

[Clipping: Malay Mail, 27 Aug 2025
green jobs headline]

300,000
GREEN JOBS BY 2050 (UP TO)

CHANGE IS COMING. WHO GUIDES THEM?

Sources: The Sun Daily via TalentCorp, 14 Aug 2025 · Deputy Prime Minister via The Sun / Bernama, Oct 2025 · Human Resources Minister via Malay Mail, 27 Aug 2025 (NETR)

THE WORKER · 03

MEET ENCIK AHMAD.
THREE PROBLEMS, NO MAP.

ENCIK AHMAD

Age	28 · TVET graduate
Job	E&E production technician, 5 years
Certificates	SKM electrical + 1 HRD Corp short course
Time	4 hours a week, limited budget
Worry	"AI will replace technicians"

1 **His CV can't show what he can do.**
"Technician, 5 years" hides the faults he fixes and the evidence he has.

2 **AI news scares him. It doesn't guide him.**
He needs to know which tasks are changing, not a threat.

3 **"Go green" has no first step.**
A lasting skill or a fad? Can he learn it in time? Which licence is he missing?

THREE WRONG ROADS ~~Another degree~~ ~~A generic AI course~~ ~~Do nothing~~

WHAT CARRIES OVER? WHAT DO I DO FIRST?

Encik Ahmad is an illustrative profile; all of his data is synthetic.

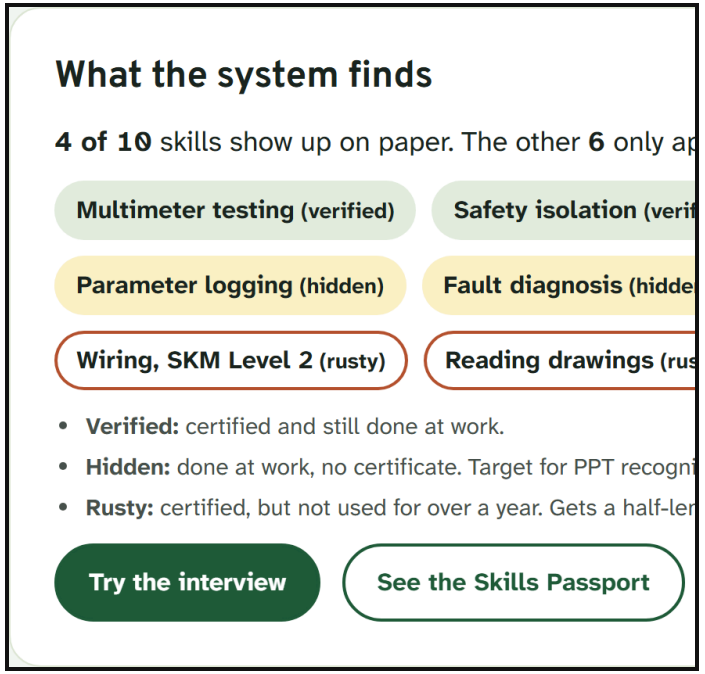

OUR SOLUTION · 04

THREE SCREENS. ONE CLEAR NEXT STEP.

CERTIFY FIRST. THEN FILL THE GAP.

1 · UNDERSTAND

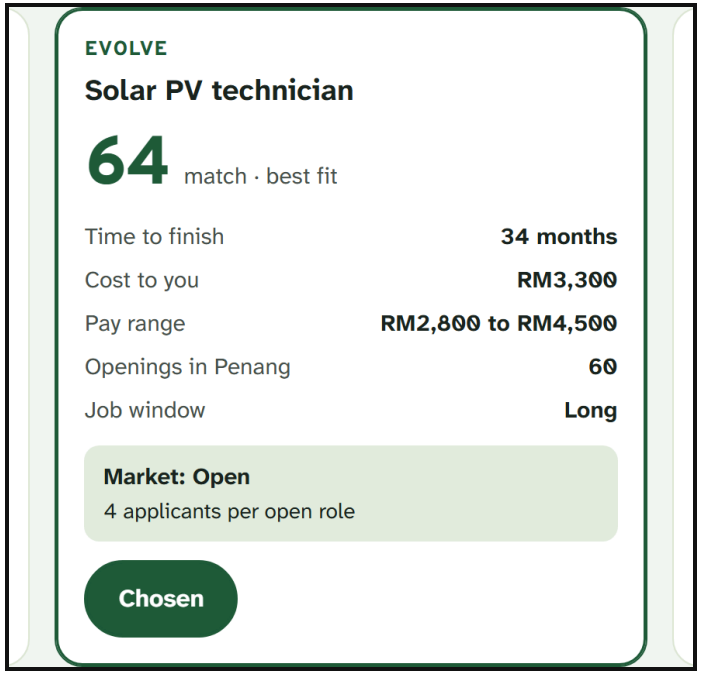

"What is changing in my job?"

→ Verified, Hidden and Rusty skills

2 · DECIDE

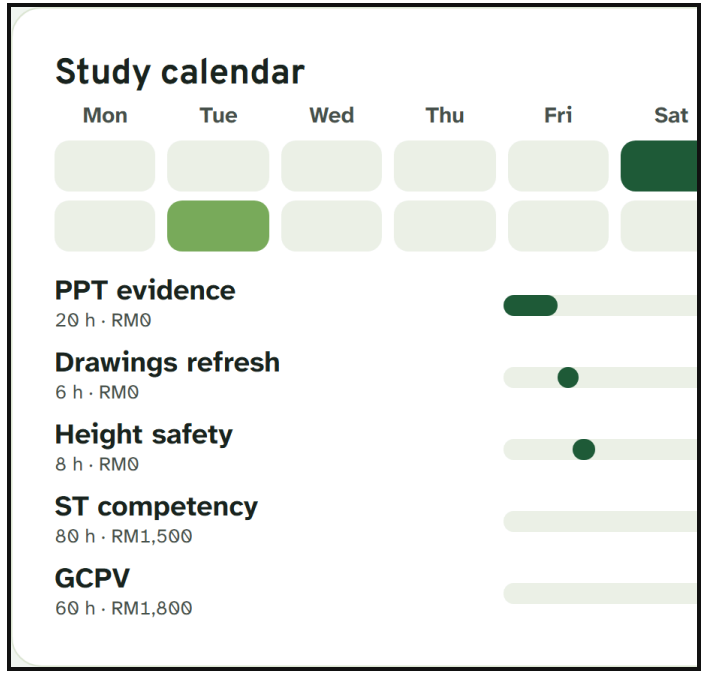

"Stay, Evolve or Pivot?"

→ Explainable ranking for his state

3 · ACT

"What can I do this week?"

→ Courses in a weekly calendar

RESULT **Career Transition Card:** chosen path · first step within 4 weeks · cost and time · missing licences

Screenshots: BijakMatch prototype, sample worker. First step order: PPT recognition → refresh rusty skills → fill gaps → statutory licence.

WHY US · 05

WHAT ONLY BIJAKMATCH DOES.

01 EVIDENCE BEYOND THE CV

Certificates + daily work log + shift interview.

02 SAME DATA, SAME ANSWER

Fixed rules on government open data. AI never decides.

03 MARKET-AWARE CHOICES

Stay, Evolve or Pivot, with job crowding shown.

04 A PLAN THAT REPLANS

Missed a week or changed your mind? One tap.

NOT ANOTHER CV TOOL.

WHAT OTHERS DON'T DO

- MyMAHIR: doesn't read your own certificates
- MGTC Green Jobs: no match reasons, no crowding check
- CV chatbots: can't read TVET skills, no sources

Comparison from the ReRole Green proposal's competitor review.

HOW IT WORKS · 06

AI READS AND EXPLAINS.
RULES DECIDE.

1 · INPUTS

Certificate upload
SVM / SKM, whitelist check

Shift interview
voice or typed, BM + English

Daily work log
evidence for PPT

2 · AI LAYER

Whisper on RunPod GPU
speech-to-text

Claude Opus 5.5 · GLM-5.3
asks the interview questions

Task-card classifier (RunPod)
answer → NOSS task card

LiveKit voice agent
live skill check

Claude + web search
state market report, with sources

3 · AI TREND & MARKET SIGNALS

Anthropic Economic Index
observed AI use per task → moderate scenario

ILO GenAI Exposure Index
upper bound → accelerated scenario

OpenDOSM · MyMAHIR
jobs and wages by state

HRD Corp · MGTC Green Jobs
courses, fees, green roles

Dated snapshots
release 2026-03, re-ranks on update

4 · RULE ENGINE

Match score
overlap + demand + interest + ease (+ SDG)

Window Score
demand − supply + pay premium

Licence gates
Suruhanjaya Tenaga, GCPV

Weekly scheduler
hours, budget, intakes

RULES.V1.JS · V1.0.0

5 · OUTPUTS

Path cards
Stay · Evolve · Pivot

Study calendar
.ics export

Transition Card
first step in 4 weeks

AI reads and explains: listens, asks questions, sorts answers into task cards, researches the local market.

Rules decide: scores, ranking, course order and schedule. AI output is schema-checked and limited to our whitelists.

APIs: Anthropic API (Claude Opus 5.5) · RunPod serverless GPU (Whisper, task-card classifier, GLM-5.3) · LiveKit Cloud · certificate check uses our own rules, no AI. Data: Anthropic Economic Index, ILO, OpenDOSM, MyMAHIR, HRD Corp, MGTC.

WHO CAN USE · 07

BUILT FOR THE WORKER.
USEFUL TO THE INDUSTRY.

TVET WORKERS

A PERSONAL PLAN

- See the skills they already have, including hidden ones
- Compare Stay, Evolve and Pivot for their state
- Get a plan that fits 4 hours a week

STAY

Line technician with automation

63 match

Time to finish	**6 months**
Cost to you	**RM320**
Pay range	**RM2,400 to RM3,200**
Openings in Penang	**140**
Job window	**Narrowing**

Market: Crowded
9 applicants per open role

Choose Stay

EVOLVE

Solar PV technician

64 match · best fit

Time to finish	
Cost to you	
Pay range	**RM2,800**
Openings in Penang	
Job window	

Market: Open
4 applicants per open role

Chosen

TVET COMPANIES & TRAINING PROVIDERS

EMPLOYER VIEW: NEXT

THE MARKET DIRECTION

- Which roles are growing, which are crowded
- Which skills to train next, by state
- **Next:** team skill-gap heatmap (employer view)

CAREER TRANSITION CARD · AHMAD

Evolve: Solar PV technician

4 hours a week · RM100 a month · Goal: Higher income

Projection · ◆ NOSS EE-320-3 · Sample Profile

Why this match — Open a part

Task overlap	15/30
Market demand	32/35
Your interest	8/15
Ease of move	2/20

Competition & Hiring Queue — ◆ Real Market Data

4 applicants per open solar technician role

Month 1

Building the PPT portfolio

Start — Month 1

Month 1: Action Plan Starts

First step: build your PPT portfolio from the work you already do on your shift. Pick a milestone below to see its course details.

If things change (§6.5)

Exit safeguard
You can't pay for the GCPV exam within 12 months, even with employer support.

Backup path
Stay: Line technician with automation. Keeps 3 of your skills.

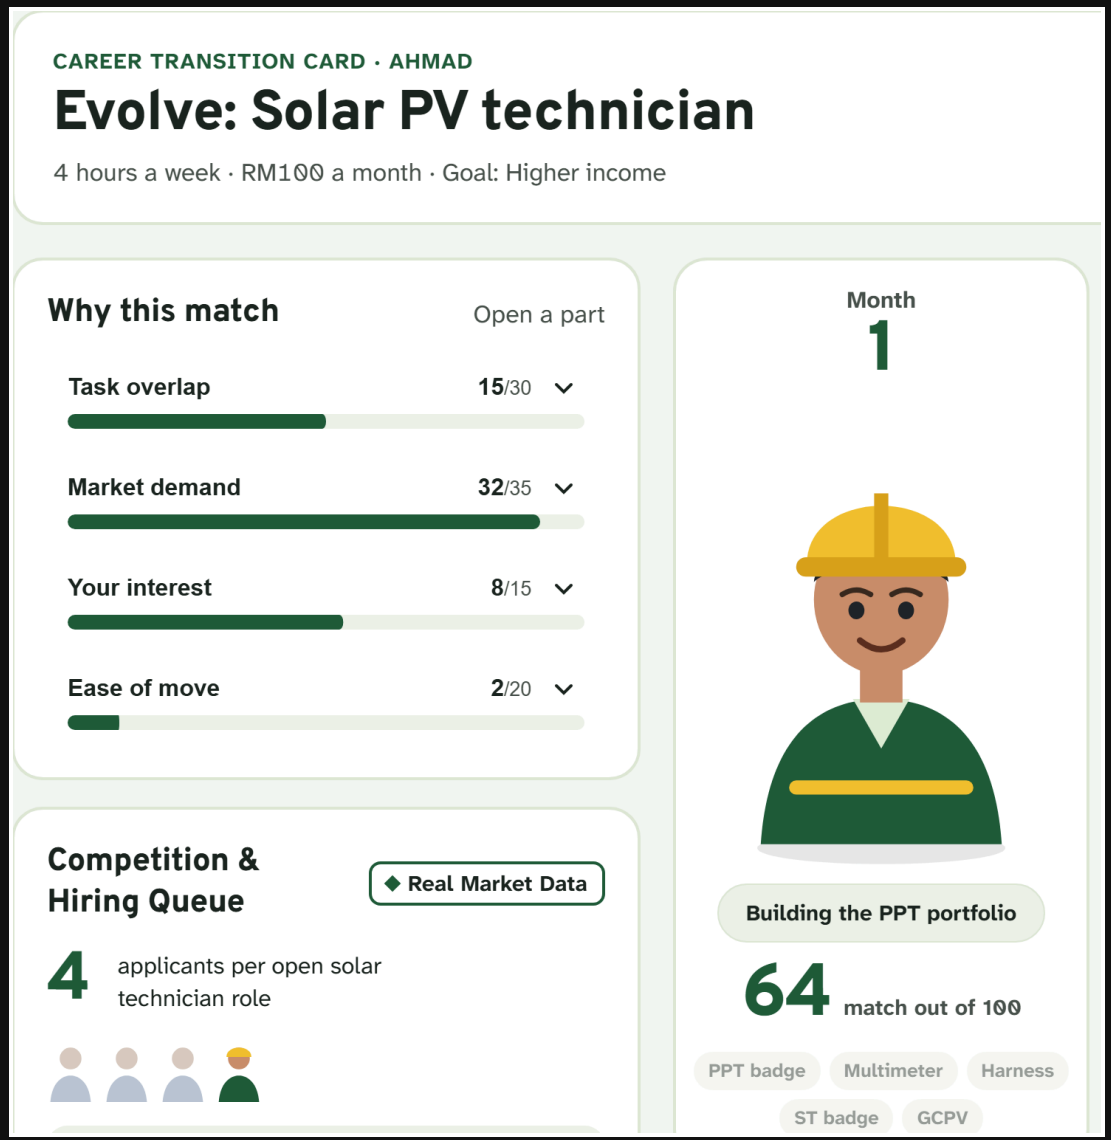

ONE CLEAR PICTURE OF WHERE JOBS ARE GOING.

The employer view is on the roadmap (proposal: future extension).

CLOSE · 08

WE DON'T PREDICT REPLACEMENT. WE DESIGN THE RESHAPING.

First certify what he knows. Then fill the gap. Then invest where the window is longest.
